Company Notes:

This is a Canadian company founded by Latin Americans. Latin Organics' mission is to promote organic agriculture in Latin America,

starting with Colombia, in the hope that illicit crops may be reduced.

We want to create awareness, not only in the producing countries but also in the markets that we penetrate.

Our first product is truly unique because of its origin and the hands that cultivate it. We pride ourselves on striving for perfection, balance and making a real difference in everything that we do. This coffee is hand

picked, sun dried and bird friendly. It is grown under shade, and it is exported and imported by Latin

Organics. It is roasted to perfection in small batches and delivered as it is being ordered. We have paid

detailed attention to our packaging design/content and quality control of our product. This first product is the pioneer that will set the terrain so that Latin Organics may continue to bring other exceptional products. We choose to work with those that are at the highest risk of losing their livelihood or traditions.

Coastal Peak Roasted Coffee - Year Round

An invitation to reconnect with your roots - a spiritual connect.

100% Colombian, Fair Trade, Organic Roasted Coffee coming direct from its country of origin. This first product offers a unique cup of spiritual arabica beans that have been blessed by the indigenous farmers that cultivate the coffee: the "richest and mildest, divine, superb" coffee as described by those who have had the chance to try it. This Medium Roast offers the chance for coffee lovers to make a cup of espresso without having to darken the roast or ruin its character by blending other beans ... unique quality - or just drinking the coffee as is. This first product is supporting Latin Organics' mission to implement fully the organic way of farming within the Colombian territory so that illicit crops, as well as poverty, may be reduced.

Company Notes:

The majority of the pickles and relishes are processed in the fall using fresh product from local suppliers. Jams are usually made from frozen products as ordered, which results in a fresher product for the customer. Pectin is used when necessary. The majority of the jams are processed using a longer cooking method so less sugar is used, bringing out the natural flavours of the fruit. Product is not certified organic but our motto is "as natural as possible." No chemical preservatives or stabilizers are used.
