## Company Notes:

The majority of the pickles and relishes are processed in the fall using fresh product from local suppliers. Jams are usually made from frozen products as ordered, which results in a fresher product for the customer. Pectin is used when necessary. The majority of the jams are processed using a longer cooking method so less sugar is used, bringing out the natural flavours of the fruit. Product is not certified organic but our motto is "as natural as possible." No chemical preservatives or stabilizers are used.
